

Details

This advanced microprocessor controlled charger is specially designed to recharge and maintain the cells of Lithium-Ion Phosphate (LiFePO₄) batteries, maximizing their performance and lifespan. Operation is simple and charging begins upon connection. No need to disconnect the battery from the vehicle. Automatically resets any low voltage protection electronics (Battery Management System). This "connect and forget" charger features 8 charging steps including a testing sequence to show if the LiFePO₄ battery can take and retain charge, a unique maximization step to restore full capacity, and patented maintenance charging to ensure maximum performance even after months of inactivity. Splash proof and dust proof. Easy and safe to use, protects vehicle electronics, spark-free, reverse polarity protected and short circuit proof. 6 year warranty.

- 8-step charging - tests, charges, and maintains
- Recover, charge and maintain LiFePO₄ batteries for maximum performance
- Safe to use - spark-free operation and reverse polarity protection. No surges or spikes
- Connect and forget - simple plug and play operation. Manual reset available

Specifications

Manufacturer	CTEK
Manufacturer's	56-926
Model No	
Battery Capacity	5.0-60 Ah
Charging Current	4.3A Max
Charging Voltage	13.8/14.4V
Input Voltage	100-115 VAC
Manufacturer's	6 year
Warranty	

CTEK Battery Charger Lithium Us - 12V

RCTK56-926

Type of Batteries

12V Lithium Ion

Phosphate (LifePO4)
