

Rain Bird Low Flow Control Zone Kit - 1" Lfv Valve w/Pr Filter RGX10319

Details

Reliable Control Zone Kits that include the Low Flow Valve, the only valve on the market that can handle low flows (below 3 gpm) without weeping. Shorter kits with only two components (valve plus pressureregulating filter) mean that you can fit more Control Zone Kits in a valve box, saving time and money. These PR Filter kits provide on/off control, filtration, and pressure regulation with fewer components; so there is less chance of leakage at the connections, both at installation and over the life of the system.
